To whom it concerns.

Hi guys,

As you know I am now in Queensland, Sumner to be exact. My work load has trebled to put it bluntly and my ability to cope with it on my own has diminished, even doing 90 and more hours weekly (7 days). I am over-run with tasks, orders, tune-ups and testing, to say nothing of administration.

I have now been offered 3 new Australian wide Agencies that would cement Gun Room as the leading air rifle supplier, service provider and tuner country wide. With these agencies comes the requirement to wholesale across Australia and for that I need help as I cannot cope alone with what I have on now.

With air rifle ownership accelerating faster than other firearms, expect to see a further surge in popularity over the next couple of years as regulations tighten up – leaving air rifles more or less out of the mix.

As a result, I am exploring one or both of the following partnership options. As this website goes to friends and foes alike, specific details will be available by contacting myself in confidence.

Options:

1. **Working Partner in Brisbane.** Investment sum would be a minimum of \$25,000, draw-down every month and you must spend a MINIMUM of 3+ days a week working on site. Some of the shared duties are detailed in **RED** below.
2. **Investor.** Talk to me.

Duties:

Adminis tration

Invoicing and payments
Ordering (90% overseas)
Email attendance
Online Orders
Research

Shop

Customer sales

Website

Articles and Blogs
Product updates and pricing
SEO

Photography (own green room studio)

Images for Website

Tuning and Testing

Tuning of all air rifle types

Pellet selection testing of all new rifles sold

Wholesale

Establish relationships with gun dealers across the country (some travel obviously)

Order Processing

Packing and shipping of products across Australia

Gun Shows

Shot Shows in Australia

Attending Gun Shows in the USA & Europe to keep pace with developments

Product Training

Overseas training covering new products, service and sales will require a passport

Tuning and testing: I can provide any training needed but as this is to be a shared task, I would expect a division of labour will occur dependent on experience.

If you have ANY interest in getting involved in the air gun industry, be it in any state, I would like to hear from you. For those of you reading this that are self-employed selling products that can complement the sale of air guns (such as camo clothing, night vision etc), this opportunity may well elevate your sales through my website whereby you can run your business in tandem to mine with no commission or fees.

If you are sitting on the fence, retired or semi-retired and looking for a change, talk to me as we may be on the same page. I am open to discussion of any sort.

Regards,

Ian McIntosh
